ABOUT US

Fuxion Biotech, is a multinational Latin American company dedicated to the research, development, and production of nutraceutical foods that complement your nutrition to achieve unique results in your body thanks to Fuxion's proprietary and patented technology, thus giving you the opportunity to achieve full health. In this way, we keep a simple but transcendent promise: **We improve your life!**

At Fuxion® we understand that health is not only "not getting sick", but to fully develop your body's potential to achieve internal well-being which is projected in your daily life. A healthy body promotes a better life.

True health that integrates physical, emotional, and financial well-being.

HOME

WHAT IS **FUXION[®]'S PROPOSAL?**

Our nutrition proposal is known as **NUTRACEUTICAL FUSION**, a work philosophy that seeks to recover the ancestral knowledge of ancient cultures such as the Andean, the Mesoamerican, the Asian and-especially-the Amazonian in the use of food for its benefits in the body, and merge them with the latest advances in biotechnology applied to human nutrition, to enhance your health and your abilities through functional and healthy products.

We use more than 1,500 active ingredients extracted from natural foods and combine them in perfect synergy, in unique formulations that multiply the benefits of each one of them in your body, for maximum well-being.

Fuxion[®] products come from a natural origin and are enriched with minerals in an organic molecule -which ensures absorption up to SIX TIMES GREATER(*)- and vitamins, flavors and colors extracted from natural plants and fruits, so that nutrients reach your body intact thus obtaining greater benefits for your health. Fuxion[®] offers you chemical-free foods with clean and easy-to-understand labels.

(*) Pineda & Ashmead, 2001; Singhal et al, 2015

WHAT ARE **NUTRACEUTICAL FOODS?**

They are functional foods with certain components called active principles extracted from natural sources that help to prevent and improve people's health condition. These elements are isolated by Fuxion® from the rest of the food in order to concentrate them and combine them in unique formulations that incorporate their most beneficial, healthy, and safe properties for your body, in order to offer them to you in delicious drinks, smoothies, soups, and teas.

Human beings have used these foods since ancient times, but only Fuxion® has managed to isolate them in their purest state and combine them masterfully to achieve the X Effect (Result Multiplier Effect) in your body.

"Let your food be your medicine, and let your medicine be your food."

Hippocrates of Cos (400 a.C.)

¿WHO ENDORSES US?

Thanks to years of scientific research and an investment of millions of dollars in developing proprietary formulas and incorporating other international patents, our functional foods have unique formulations that create a synergic effect in your body.

Fuxion® has certifications that guarantee its processes and business, and develops its products based on the highest standards in the industry.

SPORT PERFORMANCE

Full health is having a healthy, disease-free body, with the correct weight, youth, and vitality for longer. To achieve this, it is necessary to supplement your nutrition with nutraceutical foods that allow each of the cells in your body to receive the quality and quantity of nutrients it needs to be at the top of its biological potential.

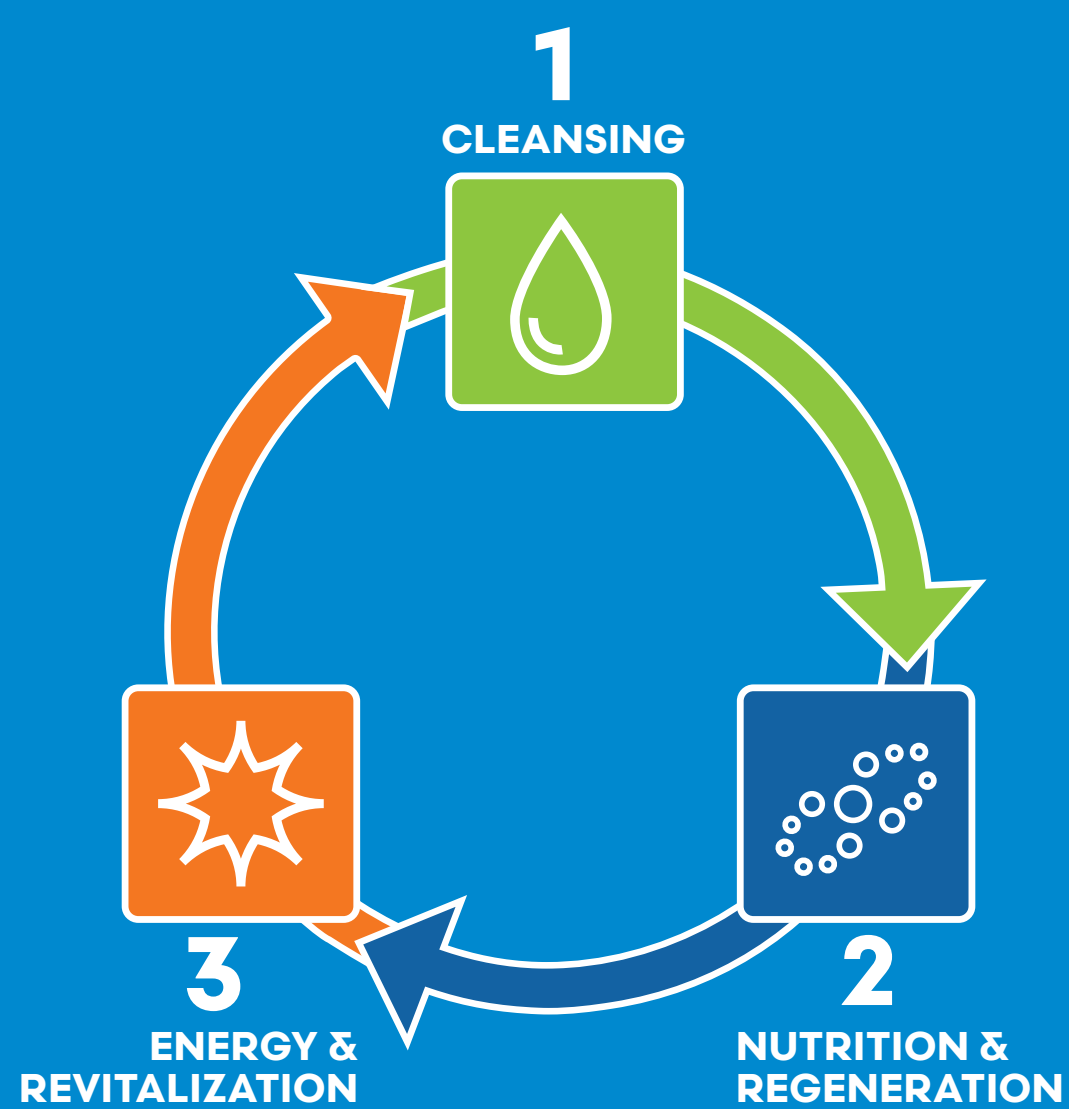

For this, we recommend consuming **Fuxion**[®] products.

CORE SYSTEM

They are the base products to complement your nutrition and help you achieve **Full Health**.

1. FIRST,
You will need to clean and balance your body.

2. THEN,
You will have to support the regeneration of each one of the cells that make it up.

3. FINALLY,
You will have to reduce cellular oxidation produced during the regeneration process **and fill your body with vitality and energy!**

CLEANSE YOUR BODY

All your body's cells and organs generate waste and potentially toxic elements. These wastes must be eliminated efficiently and constantly, otherwise they accumulate in your body and affect your defenses, making you more prone to diseases.

Effervescent soft drink with ingredients that help reactivate you while promoting detox function and helping the proper functioning of the liver.

By consuming it daily you will achieve:

Maintain optimal metabolic functions of the liver.

Keep the body in balance, clean of toxins.

Promote the depurative function from the digestive system.

BENEFITS OF A DETOX PROGRAM

Detoxifying the body can benefit everyone, especially people with constipation, indigestion, migraines, fatigue, abdominal fat, & acne among other things.

What does the detoxification process involve?

Detoxification is a natural process where the human body gets rid of toxins, converting compounds that are not soluble in water, in soluble, to be eliminated through urine, sweat, bile or feces. These processes occur, mainly, in the liver and are influenced by genetics and the environment, including diet.

MAIN BENEFITS OF A DETOX PROGRAM:

* **Supports liver cleansing.**

Liver is responsible for energy, heart health (cholesterol production), in addition to the hormonal balance (it is one of those organs responsible for estrogen biosynthesis).

* **Support in weight loss.**

Regardless of the effects on the liver, the foods included are low-calorie. Consuming less energy is the approved scientific method to lose weight.

* **Supports skin health and mental clarity.**

Programs that support cleaning recommend foods and lifestyles that will tend to decrease the intake of toxins, thus favoring a better quality of the skin and less fatigue.

HEALTHY DETOX TIPS:

Consume:

Herbs and spices: mint, ginger, cinnamon, cayenne pepper, turmeric.

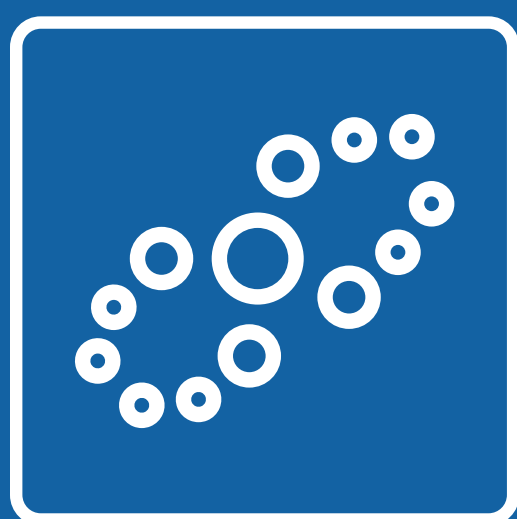

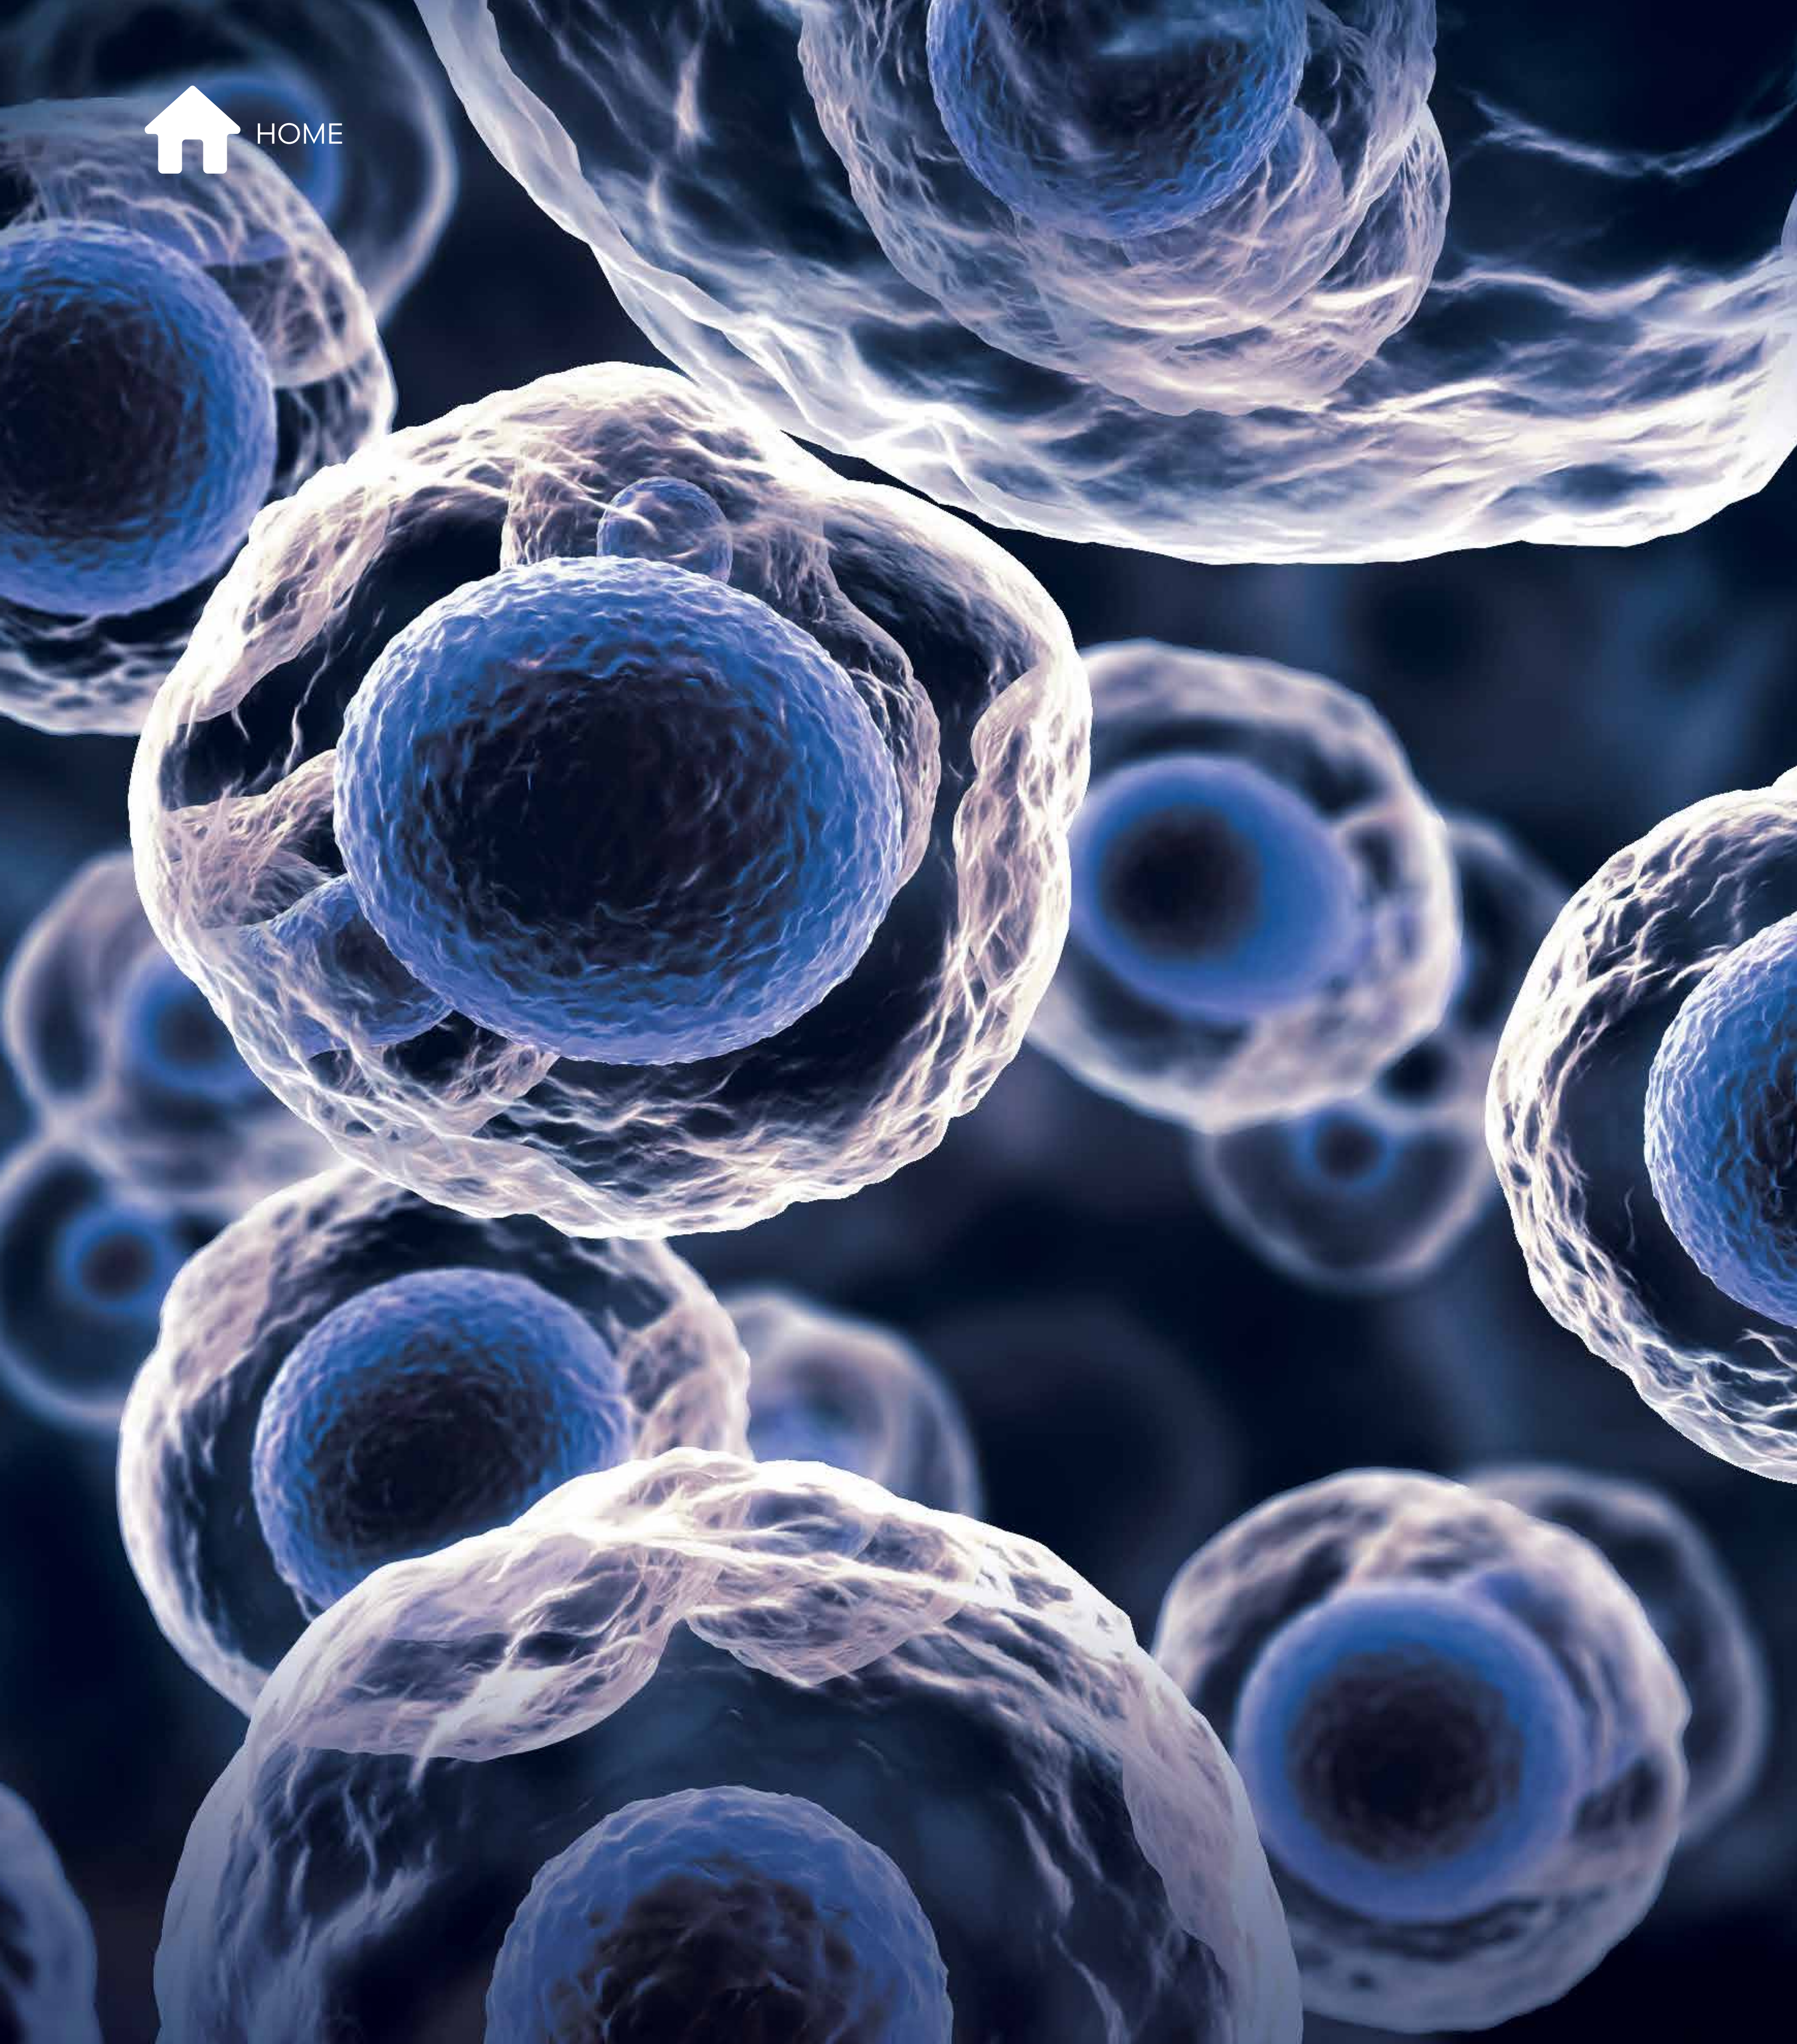

Fruits: watermelon, cucumber, lime, grapefruit, blackberries, blueberries, raspberries, strawberries.

Vegetables: cruciferous (watercress, broccoli), garlic, onion, pore, carrot, celery, parsley, fennel, tomato.

Nutraceuticals from Fuxion[®]'s Core System (1)

Avoid:

Conventional dairy products, sugars (desserts), processed foods (fried foods, high-fat foods, dressings, etc.), alcohol, artificial colors, gluten (wheat, oats, rye, barley).

NOURISHES & REGENERATES YOUR CELLS

Every day 300 million cells die in our body. A healthy body with full health maintains a constant cell-regeneration process, thus ensuring the proper functioning of all biological processes and tissue formation.

PROTEINS AND THEIR IMPORTANCE FOR OUR HEALTH

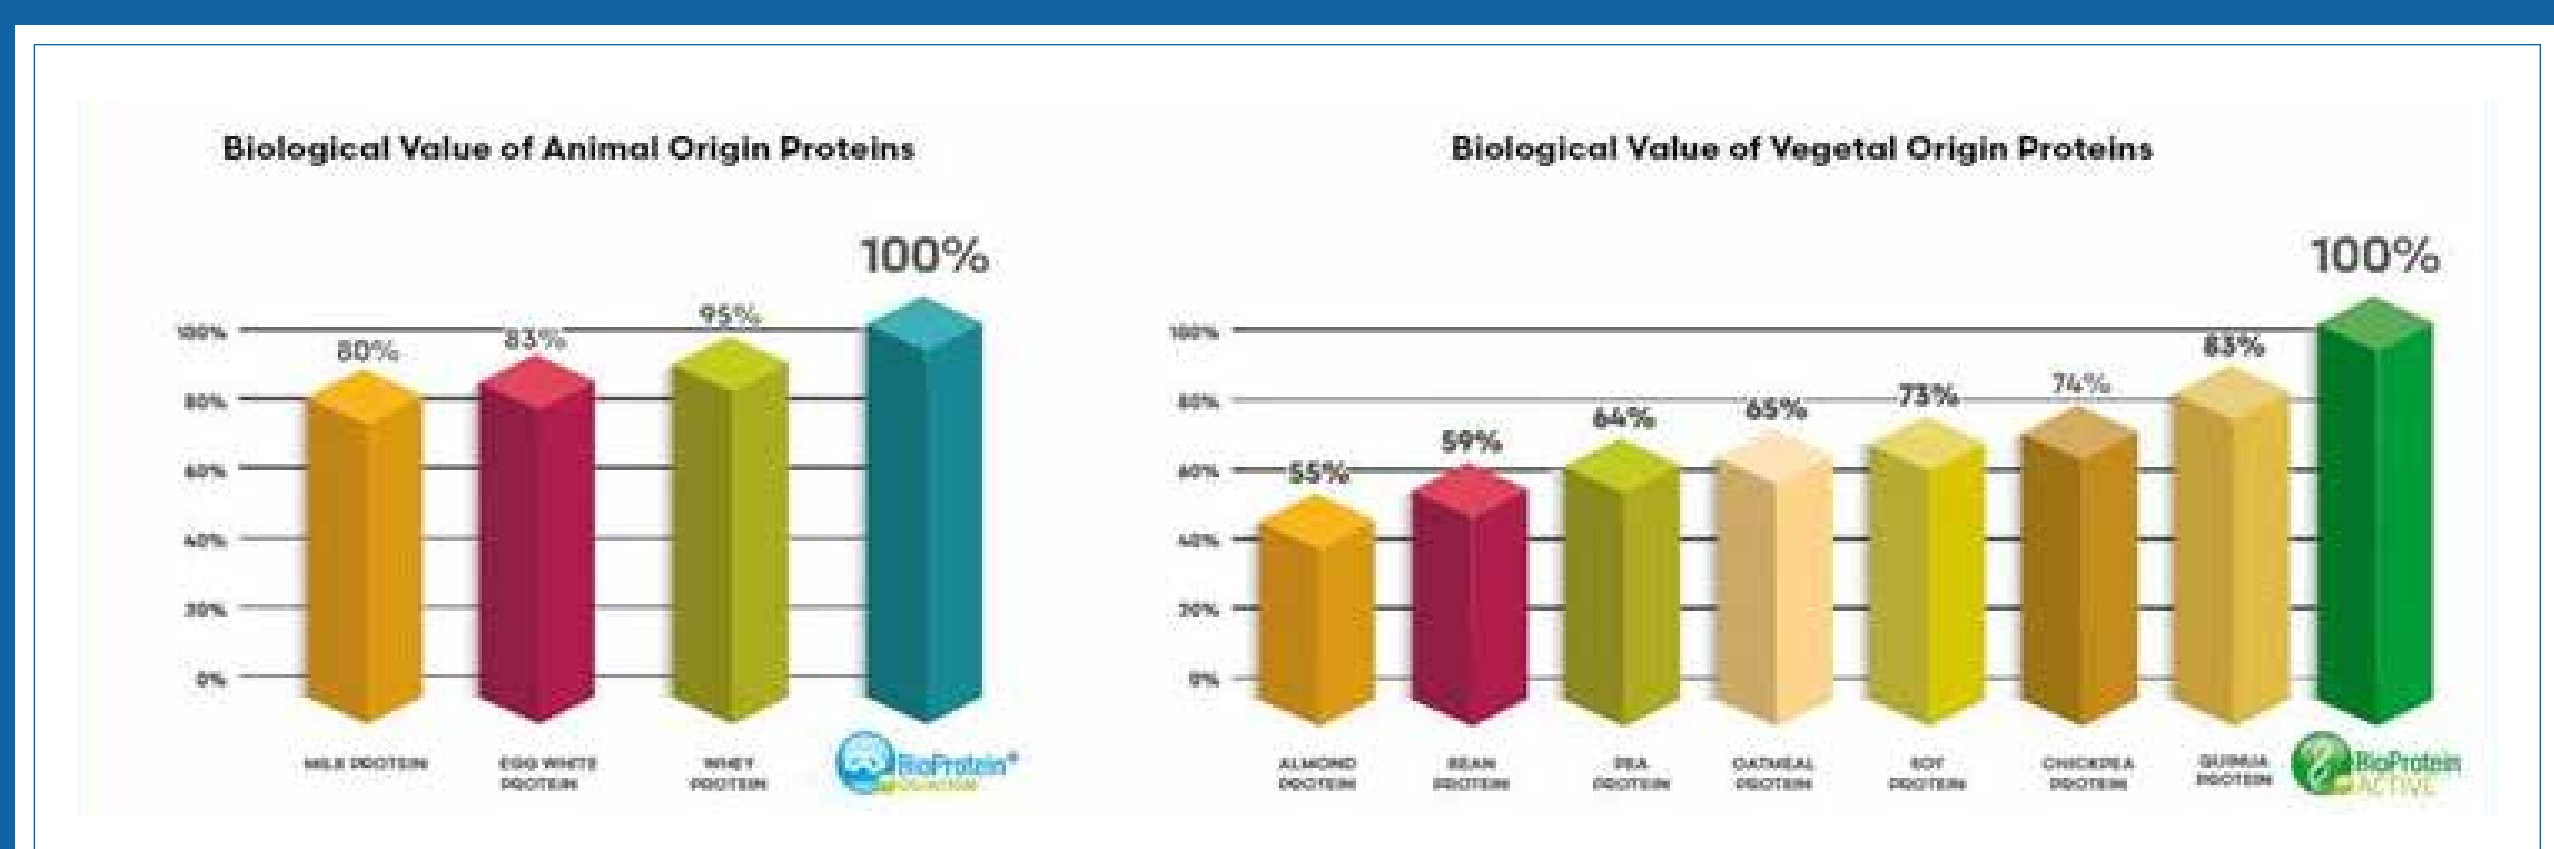

Proteins are important because they are the basic material of living cells. Proteins nutritionally support growth in children, while in adults they optimize cellular regeneration processes, thus slowing down aging and the appearance of diseases. Proteins are human beings' nutrient par excellence.

BIOLOGICAL VALUE

The proteins are made, in turn, by smaller structures called amino acids, which are classified according to the body's capacity to synthesize them. Essential amino acids are those that the body cannot produce and are only obtained through food consumption.

The proportion of essential amino acids defines the Biological Value of a protein: the greater the proportion of essential amino acids, the higher the Biological Value of a protein.

Thanks to Fuxion[®], you can improve the nutrition and regeneration of your cells and tissues with the highest biological-value proteins.

PROTEIN DAILY RECOMMENDED CONSUMPTION

	Recommended daily intake
Children + 3 - 11 years old	3.3 pounds of protein / pounds of weight
Teenagers + 12 - 18 years old	2.8 pounds of protein / pounds of weight
Adults + 19 or more	2.2 pounds of protein / pounds of weight
Muscle Development	4.4 pounds of protein / pounds of weight
Pregnancy	17.6 additional pounds daily
